

ISM200

Private wells plagued with red staining, rotten egg smell, and/or black staining, are often referred to as “problem water” applications. These issues can not only be aesthetically unpleasing, but unhealthy as well. The Aerus ISM200 whole house filter is a proven method for reducing iron, hydrogen sulfide, and manganese present in your water.

Exclusive ceramic core valve
by Aerus Origins™

Features

- Dependable oxidation media with the flexibility to operate either with or without chemicals for maximum performance
- Digitally metered controls to ensure that wastewater is kept to a minimum
- Flexible cycle controls for efficient and effective operation
- Robust Ceramic Core valve construction for trouble free performance even in corrosive water
- Capable of air draw or chlorine assist operation offering greater oxidation potential

Benefits

- Reduces ($\geq 95\%$) iron levels to prevent red staining on surfaces and fixtures
- Reduces hydrogen sulfide levels to prevent rotten egg odors
- Reduces ($\geq 99\%$) manganese levels to reduce black staining
- Automatic function offers “hands free” operation

Specifications

- NSF certified manganese dioxide oxidizing media; 1 cu.ft.
- Reduces up to 8 ppm Iron; up to 3 ppm Hydrogen Sulfide; and up to 5 ppm Manganese
- pH range: 6 - 9
- Operating pressure: 20psi min – 125psi max
- Operating temperature: 34°F - 110°F max
- Plumbing connections: 1”MNPT; ½” drain
